ENERGY FIELDS ELECTROPHOTONIC ANALYSIS IN HUMANS AND NATURE

Dr. Konstantin Korotkov

This book presents the state of the art, principles and ideas of Electrophotonic analysis based on Gas Discharge Visualization (GDV) technique, known as well as Electrophotonic Imaging (EPI). This approach, celebrating now 20 years after developing the first GDV instrument, has a strong scientific foundation with thousands of researchers, doctors and practitioners using it in the world. Electrophotonic methods allow to study Energy Fields of humans, water, materials and environment. Conceptual background and practical approaches are presented in this book.

Second updated edition

Contents

INTRODUCTION 6
Highs and lows of modern medicine 7
Principles of the systemic approach in biology. 10
The concept of a biological field 15
What is Consciousness? 17
PART I: GENERAL PRINCIPLES OF ELECTROPHOTONIC (GDV) ANALYSIS 27
Technology 29
Advantages of the EPI/GDV Bioelectrography technique 30
Indications for the application of the EPI technique 31
Material and technical support 32
Scientific Evaluation 34
What does the EPI method measure in physical terms? 35
Can this emission take place without an electric field? 36
What does the EPI method measure in biophysical terms? . . . 37
Where does the electronic current in the body come from? . . . 38
What is energy? 41
What is biological energy? 42
What does the EPI method measure in physiological terms? . . 43
What is the sensitivity of the EPI method based on? 46
The influence of mental, emotional and spiritual processes on EPI/GDV images 46
PART II: PRACTICAL BASIS OF ELECTROPHOTONIC (GDV) ANALYSIS 49
EPI images with and without filter 39
EPI/GDV Diagram program 56
Parameters of BIO-gramsused for the analysis 57
EPI Software Design 62
L-R symmetry 66
Analyzing Human Energy Field 68
Heightened Awareness Zones 78
Stability of data 85
Recommended procedures for recording BIO-grams. 87
Statistical distribution in EPI glow parameters of fingers 89

PART III: THE CONCEPT OF HOMEOSTASIS LEVELS IN ELECTROPHOTONIC (GDV) BIOELECTROGRAPHY 93
Levels and Zones of Homeostasis 95
Particular features of EPI data for different homeostasis levels 100
H (Health) homeostasis zone 100
HS (Health + Stress) homeostasis zone 103
P (Pathology) homeostasis zone 120
ASC (Altered States of Consciousness) homeostasis zone . . 138
PART IV: THE REFINEMENTS OF ELECTROPHOTONIC (GDV) ANALYSIS 141
Noise level 142
Stress examples 145
Sectorial analysis of BIO-grams. 147
Basic rules of EPI analysis 159
Monitoring of the patient's condition during treatment 164
Dynamic EPI capture 165
Analysis of psychological condition 139
Using EPI parameters when analyzing data 168
Energy fields, meridians and chakras 171
PART V: ENVIRONMENT SCAN AND REMOTE DETECTING OF HUMAN EMOTIONS 173
Non-local consciousness influence to physical sensors 179
PART VI: DIFFERENT RESEARCH LINES 189
Electrophotonic Analysis of Arterial Hypertension. 189
Express-evaluation of the psycho-physiological condition of the Paralympic athletes 198
Comparative assessment of the impact of drinking water quality on the athletes' condition during exercise. 206
Can a bird fly across the Atlantic? 214
